Agile Testing Services

Keeping Pace with Digital Transformation

About Sixsentix

Sixsentix is a leading provider of software testing services and visual analytics, helping companies to accelerate their software delivery. Sixsentix' unique collaborative reporting provides enterprises with unprecedented testing quality and visibility across testing projects for faster time-to-market. Sixsentix Onsite and Nearshore Software Agile Testing (SWAT) services deliver optimized testing outcomes at significantly lower costs and help scale to keep pace with applications. Customers include the world's largest global financial institutions.

Recognized as a leading expert in Tricentis Tosca Testsuite, and for testing visibility across solutions including HP QC Enterprise and SAP, Sixsentix is growing rapidly. Sixsentix is the first partner to achieve the Tricentis "Master" TCP (Tosca Certification Implementation Partner) status.

Our customers follow many types of approaches including:
  a. Software Agile Testing
 b. Classic Waterfall approach to testing
  c. In-House developed approaches

Regardless of the approach, Sixsentix Services improve testing outcomes on time, on budget.

Why Sixsentix?

Deep Industry Expertise

Risk Avoidance - Unprecedented Quality

Expert Domain Knowledge

Nearshore & Onsite Managed Services

Transformation of High Cost to Low Cost

QA Dashboards & Visual Analytics

Where & When

Onsite Software Testing
Nearshore Software testing
or *Blended* Approach

Benefits

Fast Time-to-Market with Lower Costs
Significant Improvements in Quality
Optimized Test Coverage
Test Automation for Greater Efficiency
QA Visual Analytics & Dashboards

Software Agile Testing Services (SWAT)

Sixsentix provides game-changing expertise with our methodology and systematic approach to professional testing. We deliver high level Test Definition and Execution including: Functional Structuring, Test Case Design, Test Specification, Test Execution and Management and QA Visual Analytics & Dashboards. This provides full visibility across projects and/or clusters for continuous Software Development Life Cycle (SDLC) improvements.

Sixsentix transforms the current outdated testing approaches and brings innovation and successful outcomes. We help larger partner companies perform impeccably with a laser focus on the right KPIs. Our SWAT Teams work alongside our clients to build the new testing structures, maximize Test Automation, set up the processes and solve critical issues quickly and expertly.

We help to improve software QA with advanced methodologies, expert skill sets, and QA Visual Analytics for continuous testing improvements, for faster time-to-market with lower risks and costs.

High Test Automation Saves Time & Effort

We leverage cost-effective solutions with world class agile testing methodology to ensure systematic delivery with excellent quality and low risk so that our Financial Services and Enterprise customers can meet their market needs. In this way, we help our customers achieve the highest automation rates with minimal business risk and optimized efficiency. We can apply our unparalleled solution to any industry which requires the highest quality of software testing and has a zero tolerance for software failure.

Sixsentix and QA Reporting with QACube - Visual Analytics and Dashboards

We provide our clients with a team of experts and efficient testing solutions, along with the QACube Visual Analytics and Management Dashboards to keep pace with applications.

QACube uniquely provides a view across projects, clusters, teams, geographies with integration to popular ALM/software testing and development tools like **Bugzilla, CA Agile Central (formerly Rally), GitLab, HP QC Enterprise, JIRA, Microsoft Excel, Microsoft Visual Studio Team Foundation Server, Tasktop, Tricentis Tosca, Sonarqube, Spira Test, XML, Xray** and more.

Designed specifically for collaboration and decision-making across the Application Life Cycle, our clients are enabled with powerful information to achieve unprecedented software quality.

Our Customers Financial Services, Multi-Nationals

The largest financial institutions in Switzerland trust Sixsentix with their Software Testing and we maintain long term, and mutually rewarding, customer relationships. Our client list contains large, multi-national enterprises, which are market leaders. With our advanced methodology, structured to handle both simple and complex business processes, we ensure that your products are deployed on time, with decreased cost and minimal defects. This provides ongoing competitive advantage to Sixsentix clients.

Our Partners Dedicated to Quality

We recognize the advantages of close cooperation with our Partners in order to achieve our key goal — assuring quality. Sixsentix has built successful, business development relationships with world-class technology and implementation partners.

Our Global Partners

+ many regional partners

"In order to take a quantum leap in improving our software delivery cycles, we knew we needed to do things differently. At our bank, this meant launching a systematic proven methodology as our new testing standard, combined with the right ALM views in QACube. The superior methodology and cross project views of all of our projects allowed us to achieve our testing KPIs."
